

CASE STUDIES

The Office Environment

Fugro

Wallingford, Oxfordshire

“Urban Planters have proven to provide a high quality, individual solution that was refined for our exact requirements”.

Steve Rogers, Facility Manager, Fugro

URBAN *planters*
for greener interiors

Urban Planters was selected by international geostructure surveyor Fugro to design, install and maintain the interior planting at its UK headquarters in Oxfordshire.

THE BRIEF

- To provide extensive planting in the building's atrium, to create a calm, natural space in the centre of the building

THE SCHEME

- In the atrium, two 5 metre **Adonidia palms** were installed in the centre in **specially designed containers**.
- Around the sides of the atrium, densely planted containers provide a natural screen for the office areas. The troughs include plants which filter out the toxins commonly emitted by modern office equipment.
- To create impact at the entrance to the building, Urban Planters selected two **80-year-old olive trees**, also in custom-made pots.
- Special care was taken when installing the large plants on the atrium's new floor to avoid damage to both the flooring and the plants.
