

CASE STUDIES

The Office Environment

Multiserv Rotherham

“We would like to express our total satisfaction from the outset with the service you have provided. Your sales presentation helped us to clearly identify not only the type of plants that we needed but also showed that the plants chosen would help to provide a well-balanced office environment. You also worked to a very tight deadline and supplied first-class plants and service.”

Maxine Cooper, PA to Regional Vice President
Europe North

When multinational steel company Multiserv relocated to new, modern offices, they were looking for a simple way to brighten up the look of the building.

THE BRIEF

- To provide a **simple but interesting planting scheme** which is not too “busy” for the modern décor.

THE SCHEME

- Urban Planters brought in a range of tropical plants to bring life to the **sleek and minimalist** interior.
- Urban Planters used only three specimens of plants throughout: Kentia palms, Sanseveria and Dracaena fragrans’ Massangeana’ to provide a **sleek and uniform** feel.
- The use of **stainless steel containers** further complemented the modern, corporate look of the building.

INTERNATIONAL AWARD

The scheme has achieved international recognition with an award from the European Federation of Interior Landscape Groups (eFIG).
