

CASE STUDIES

The Office Environment

S4V Sheffield

“Urban Planters has provided our company with a consistently professional and high quality service. They selected the ideal plants and containers for our converted Victorian Library: they really bring the rooms to life and create the ideal environment for meetings and conferences. We wholeheartedly recommend Urban Planters to any businesses wanting to give their workplace a boost.”

Sandra Pilarczyk, Director, S4V Ltd
Searching for Venues, Gateway Meeting
Place Conference Centre

THE BRIEF

- To provide appropriate planting for its new **meeting facilities** which, as a 100-year-old library recently renovated into state-of-the-art facilities, was a mixture of **old and contemporary décor**.
- The plants also had to be **easy to move**, to adapt the meeting rooms for a variety of uses.

THE SCHEME

- Urban Planters selected a range of both well known and more unusual plants, including Ficus trees with spiral stems, arranged three in a row to make an **eye-catching feature** and providing a **natural screen** to break up a large room.
- The plants were put in **containers on castors** to allow staff to quickly rearrange the room with minimum effort and little disruption for the plants.

INTERNATIONAL AWARD

The scheme made such an impact that it won an award at the European Federation of Interior Landscape Group (eFIG) Awards 2005.
