## The Leisure Environment

### Roko Leisure Club Nottingham

*“You are incredibly passionate about your work as you took a huge amount of time to ensure that the right mixes of plants were chosen. We are extremely pleased with the end result and we cannot fault the service we have received from you.”*

Jonathan First – Roko Leisure Clubs

When Roko opened its state of the art health and fitness centre in Nottingham, it signed up Urban Planters to bring its premises to life.

#### THE BRIEF

- To create **eye-catching plant displays** around the health centre, using unusual plants and containers.
- To use plants to create a **relaxing atmosphere** around the leisure club.

#### THE SCHEME

- Urban Planters selected a variety of **interesting tropical plants**, including Yucca and cacti specimens, and planted them in unusual containers to create focal points around the centre.
- To compliment the **smart entrance** of the building, two bay trees were positioned either side of the door.
- After a look around the centre, Urban Planters realised it could also offer a more sophisticated way of ensuring security and privacy around the outdoor swimming pool, using 67 metres of **replica Buxus hedging around the pool**. The hedge requires virtually no maintenance whilst providing a more attractive screen than a standard fence.
