

CASE STUDIES

The Leisure Environment

Esporta Oxford

“We have been delighted with the service that we receive from Urban Planters and we have noticed how both our internal and external landscaping has improved considerably since we started working with them.”

Simon Stokes, Esporta

In its contract with **Esporta Health and Racquets Club**, Urban Planters went the extra mile, supplying a range of planting for the club's exterior areas, including around the outdoor pool.

THE BRIEF

- To design and supply a planting scheme which would create a **relaxed atmosphere** for members coming to use the facilities.
- To select specimens and containers which would enhance the modern décor throughout the building.

THE SCHEME

- Inside the club, live specimens were planted in **modern**, lechuza containers.
- Outside, topiary balls and spirals in blue ceramic containers created a **secluded area** around the pool, while a **trellis intertwined with ivy** disguised a wall.

As the club bought the exterior planting outright, Urban Planters **trained the maintenance staff** in how to care for the specimens on an ongoing basis.
