Marriot Hotel Sheffield

“We are delighted with the efficient and unobtrusive service that Urban Planters continue to provide. We frequently receive compliments from guests and visitors to the hotel, as our plants and displays continue to flourish under the watchful eye and green fingers of Urban Planters. I would have no hesitation in recommending them.”

Alan Richmond, General Manager

Urban Planters maintains a range of plants throughout the Marriot hotel in Sheffield, including tropical specimens in the restaurant, bar and leisure areas.

THE BRIEF

- To provide regular maintenance of the tropical plants in the hotel.
- To solve the problem of failing plants and foliage damage due to **regular movement**.
- To ensure plants in the glass roofed swimming pool did not suffer from **excess light and heat** exposure.

THE SERVICE

- Urban Planters provides **diligent and regular maintenance** of all the plants at the Marriott, ensuring that they thrive.
- Where plants were regularly moved, Urban Planters brought in **containers on castors**, so that moving them would be both easier for staff and less disruptive for the plants.
- Urban Planters has built up a **strong working relationship** with the management through going the extra mile with its service. Urban Planters' philosophy is to ensure that 'maintenance' encompasses maintenance of the site and the client's happiness and not just specifically maintenance of plants.

INTERNATIONAL AWARD

The scheme has been so successful that it won an award at the European Federation of Interior Landscape Awards 2005.
