

ARTIFICIAL
OUTDOOR

UV
edition

ENJOY
THE SUN

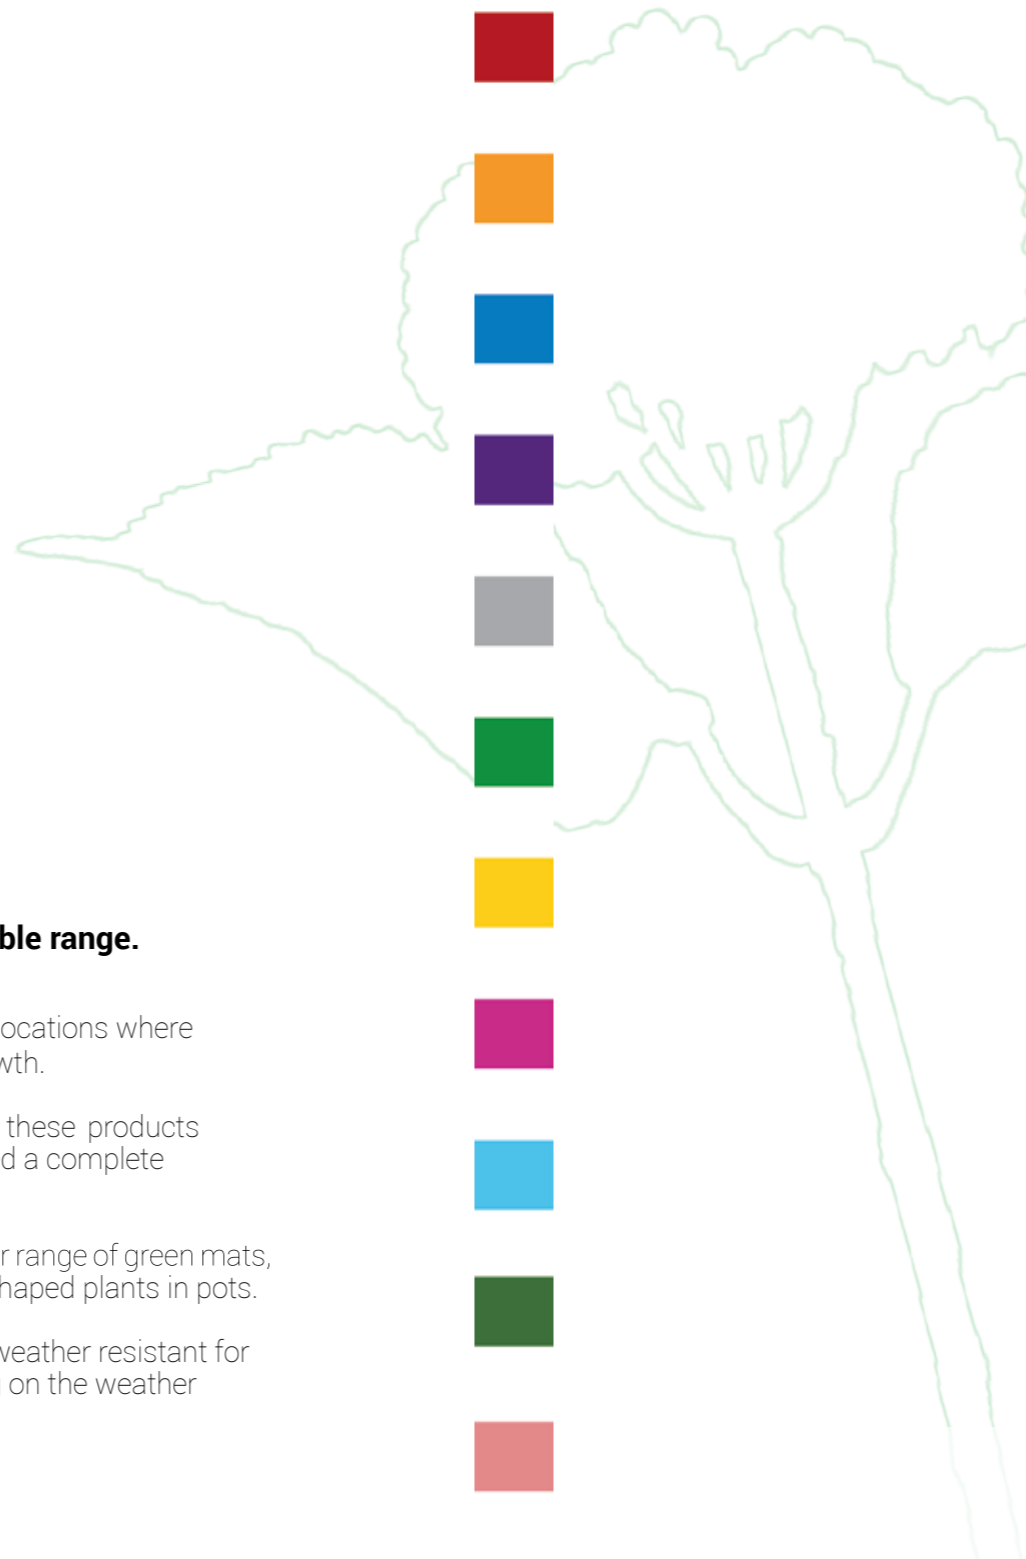

We are proud to present our UV-stable range.

Artificial plants are a good alternative in locations where environmental factors impede plant growth.

It has recently become popular to use these products outdoors and we have therefore designed a complete collection for a variety of applications.

In this brochure you can find details of our range of green mats, our single-ball, ball in pot, and pyramid-shaped plants in pots.

All these products are UV resistant and weather resistant for 2 years. This period may vary depending on the weather conditions.

Hedera Pyramid in pot.
(Basket not included)

Our UV range has a variety of mats and Hedera and Boxwood plants.
